Animal Tracker Proposal

Yixiu Tian

Statement of Intent

The app I'm going to create is Animal Tracker, and I'm going to focus on dogs. It's an app that allow you to make a track of where you find a dog. It's more like a record and storage of how many dogs you have tracked. And there is a card sort that you can categorize them to distinguish the breed of dog. You can browse the history of how many dogs you have found and where you found them.

The purpose of the app is to record the dogs you find. And it's a fun way to make dog person record their fun moment. Otherwise, It's also a way to know more about dog breeds.
